INSULATION & ACOUSTIC CORRECTION

PFAFF

EOS DIGITAL

When **art**, **matter** and **sound** unite **in harmony**.

In the silence of her Quebec studio, Marie Dooley brings the material to life.

A former fashion designer, she has made textiles her language, sewing an art, and precision a poetic gesture. Each work is a sensitive composition, born of thread and hand, imbued with movement and silence.

His art is expressed in the fabric: a stretched, worked, sewn and signed canvas, where line and texture dialogue with the light.

It is this dialogue between art and sensation that inspired the collaboration with **Tecsound®**, acoustic expert of the **SOPREMA group**. For more than twenty years, **Tecsound®** has been shaping innovative acoustic solutions, combining acoustic performance, comfort and design. With **PUREKUSTIK**, the acoustic panel made of recycled material, the brand pushes the limits of the material to offer products that are aesthetic, durable and effective in controlling sound.

From this encounter between textile art and acoustic engineering was born the **PUREKUSTIK ART FABRIC** collection. By combining Marie's works with **PUREKUSTIKK acoustic panels**, this range combines the beauty of gesture with technical performance.

Indeed, beneath the softness of the textile, an invisible acoustic technology acts silently: it absorbs sound waves, softens reverberation and transforms each work into a room of well-being.

PUREKUSTIK ART FABRICS embodies the alliance between artisanal creativity and acoustic engineering.

Made from recycled polyester (PET) fibres, classified B-s1, d0 and certified VOC A+, these panels combine comfort, design and durability.

Here, art is not only contemplated — it is lived, felt and listened to.

In this way, each canvas is transformed into a discreet and refined acoustic object, a element of well-being at the service of living and working spaces.

PUREKUSTIK ART FABRICS — when the material speaks to the eye and soothes the ear.

_MARIE **DOOLEY** HAS DEVELOPED A **RICH AND INSPIRING** CAREER, MARKED BY **A DEEP PASSION FOR TEXTILES**

Marie has worked in the fashion industry as a designer, running her own fashion house, Marie Dooley Signature, in Quebec City from 1993 to 2015. Her distinctive vision and know-how have earned her a reputation for excellence in the world of Quebec fashion

Since 2015, Marie has transposed her love of fabrics to the world of interior design, where she explores the infinite possibilities of textile materials and shapes. Her innate sense of aesthetics and mastery of tailoring manifest themselves in refined creations for the home.

In 2022, she launched her first collection of textile paintings, marking a decisive step in her artistic career. Each work is the result of a meticulous process: each form of a drawing is cut, sewn and assembled on a wooden frame in his Quebec City studio, then signed by his hand.

Today, Marie Dooley continues to explore the interplay between art and functionality, demonstrating that textiles can not only beautify a space, but also enrich the sensory experience of those who inhabit it. Her work, imbued with sensitivity and know-how, reveals the timeless beauty of textiles as an artistic medium.

_PUREKUSTIK – ACOUSTIC EXCELLENCE BY TECSOUND®

_ Behind the canvas, the material that makes up the difference

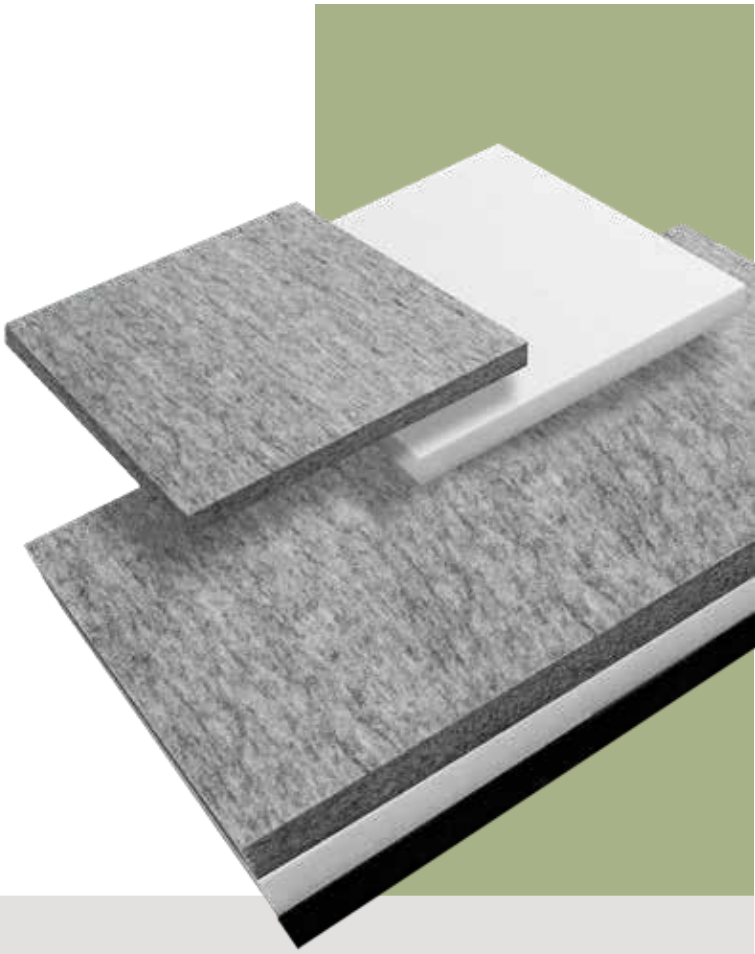
Beneath the visible beauty of the creations, a discreet element acts silently: **PUREKUSTIK**.

This acoustic panel is the technical heart of the **PUREKUSTIK ART FABRIC collection**.

Invisible, but essential, **PUREKUSTIK** gives all its depth to the collection.

Thanks to its porous structure and its studied density**, PUREKUSTIK** acts like a sponge, and traps sounds to ensure effective correction over the entire frequency spectrum.

He transforms art into a complete sensory experience: beautiful to look at, soothing to listen to.



_Why choose it?

Where a classic stretched fabric only brings a visual dimension, **PUREKUSTIK ART FABRIC** incorporates real acoustic technology.

Hidden behind the stretched canvas, **PUREKUSTIK** absorbs sound, reduces reverberation and transforms each work into an acoustic comfort solution.

_CLASSIC CANVAS		_PUREKUSTIK ART FABRICS
Purely decorative		Aesthetics and acoustics
No effect on reverb Neutral		Measurable sound wave absorption ISO 354
media	→	certified panel, Class A (αw 0.90-1.00) Recycled,
Neutral environmental impact	→	recyclable, VOC A+
	→	
	→	

PUREKUSTIK thus gives an active role to the decoration: it sublimates spaces while making them more pleasant to live in.

_TECHNICAL SPECIFICATIONS

Tested according to international standards, PUREKUSTIK offers a level of performance that is among the best in its class:

Characteristics	Value / Ranking
Sound absorption coefficient (αw)	0,90 to 1,00 – Class A
Fire classification	B-s1, d0
Density	50 kg/m³
Nominal thickness	40 mm
Thermal conductivity	33,5 – 34 mW/(m·K)
Microbial resistance	Inhibits mold growth

Results confirmed by certified acoustic tests (GINGER-CEBTP, BEB2 reports. M.6077-3 & 4).

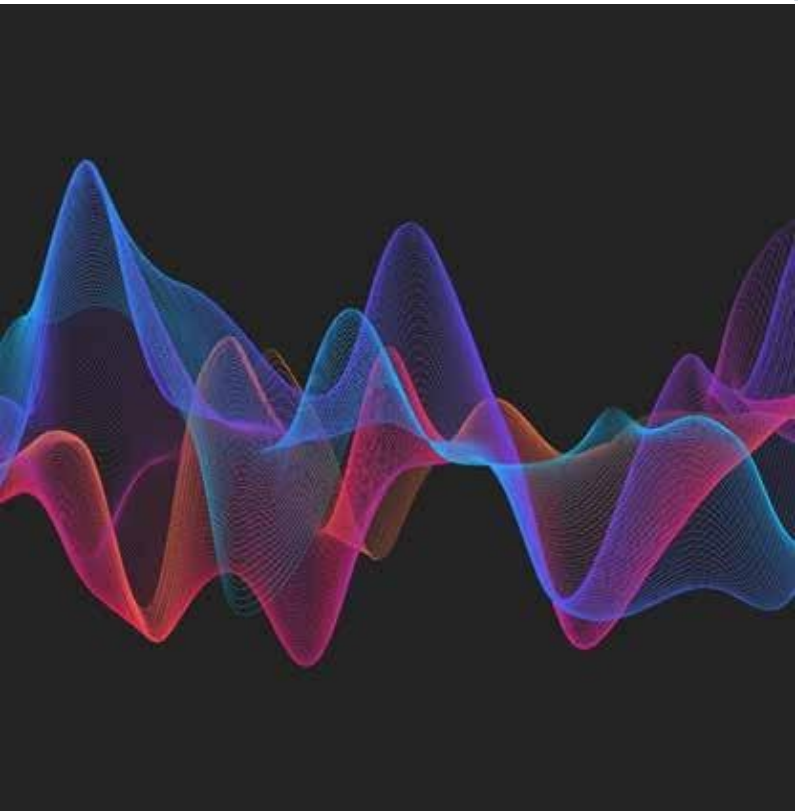
PUREKUSTIK significantly improves intelligibility in resonant spaces and reduces the ambient noise level in a measurable and immediate way.

_The acoustic heart of the collection

Made from recycled polyester fibres (PET), **PUREKUSTIK** combines acoustic performance and lightness.

This invisible technology has a direct impact on acoustic well-being, while respecting high environmental standards.

- Up to 60 recycled plastic bottles per m²
- Solvent-free, formaldehyde-free. VOC A+
- Recycled and recyclable product by making a product durable.



_A guarantee of quality signed Tecsound®

Acoustic expert of the **SOPREMA group,** Tecsound® has been developing high-performance insulation and acoustic correction solutions for more than 20 years.

The result of mastered industrial know-how, **PUREKUSTIK** panels are subject to demanding quality controls throughout their manufacture.

Each product is designed to offer certified acoustic efficiency, fine aesthetics and proven durability, meeting the requirements of interior design, architecture and decoration professionals.

PUREKUSTIK embodies the Tecsound® signature:
An alliance between innovation, acoustic control and excellence in materials.

_COLLECTION **TEXTILE PICTURES**

When sewing becomes language and material, design

The **TEXTILE PICTURES collection**, signed **MARIE DOOLEY**, offers a contemporary reading of textiles.

Each work is a composition of balance and movement, where the material, cut and sewn by hand in Marie's studio in Quebec City.

The exclusive fabrics used by Marie become graphic surfaces: sometimes sober in black and white, sometimes bursting with colour.

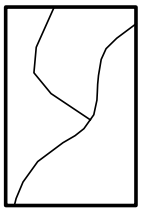
Her work explores structure, texture and light, translating a found harmony.

Behind these creations, the **PUREKUSTIK acoustic panel** brings an extra dimension and acts silently.

He gives these works a peaceful atmosphere, optimising acoustic comfort without altering the accuracy of the line or the creative intention.

Textile art at the service of **Comfort** and **space**

ESPOIR



_ORGANIC WORKS

Fluid and sensitive, these works unfold in the softness of movement and the spontaneity of the line.

The contours are free, almost instinctive, like echoes of nature or life in motion.

The shapes intertwine, superimpose, breathe. They give off a sense of calm and naturalness, where texture and colour contribute to a visual emotion that is both soothing and lively.

INTERACTION

_GRAPHIC WORKS

A play of lines, angles and balances: these works draw their strength from the rigour of the gesture and the clarity of the contrasts.

The compositions are built around precise, sometimes minimalist geometric shapes, where each cut becomes a statement of intent.

The gaze circulates between tension and stability, in a dialogue between structure and space. These paintings evoke architecture, design and modernity, while maintaining a tactile and human presence.

_COLLECTION **TRAIT**

The art of the wire in motion

The **TABLEAUX TRAIT** collection by **MARIE DOOLEY** explores the beauty of the simple gesture and the strength of the line.

Inspired by drawing and movement, it translates an expression that is both refined and lively, where each hand-sewn thread becomes a line of emotion.

In this series, the shapes are drawn directly with the thread, like a pencil sliding on the canvas.

This precise and spontaneous gesture composes a sober and balanced visual language, oscillating between calm and energy, structure and freedom.

Each work is made in Marie's studio in Quebec City from carefully selected fabrics, then stretched on a wooden frame and signed by hand.

Behind the canvas, the **TABLEAUX TRAIT collection** incorporates the acoustic technology developed by **Tecsound®**: the **PUREKUSTIK panel** absorbs sounds and softens reverberation, giving these creations an additional dimension of appeasement, without altering the purity of the line or the strength of the drawing

Line as language, silence as a **framework**.
